SOUTH DAKOTA KIDS COUNT

Telephone: (605) 677-6432

FAX: (605) 677-5427

December 2016

We hope you rely on South Dakota KIDS COUNT for all the information you need about children in South Dakota. According to the latest population estimates, children and youth make up one-fourth of all South Dakotans – 211,324. The 24th annual South Dakota KIDS COUNT Factbook has demographic, economic, education, health, safety, and now regional data all in one place. Using the data we want you to inform others and influence public policies and programs on behalf of children and families in the state. If you are a business leader, we hope this book will help you sharpen your focus on children and family issues, both in your external work and internal policies.

In addition SDKC publishes a Facts on KIDS Issue Brief on topics that emerge from the data. Data are available in the KIDS COUNT data center. A map, line graph or bar chart can be created from the data. Create a line graph for up to 7 locations and up to 10 years of data to assess how things have been changing over time. Create a bar graph for up to 5 locations with one year of data. Another option is to save the image to insert into a report. You can also download the raw data to create your own charts and graphs.

You can follow us on Twitter: @SoDakKC and Pinterest: southdakotakidscount; Like us on Facebook: @southdakotakidscount.

Call on us to help you identify, analyze, and develop strategies to improve the lives of all children in South Dakota.

Sincerely,

carole cochran
project director

Maggie Cockburn
Staff Assistant

Elizabeth Tong
Information Specialist

STATE OF SOUTH DAKOTA
DENNIS DAUGAARD, GOVERNOR

December 2016

My Fellow South Dakotans,

The South Dakota KIDS COUNT Factbook provides statistical information for people across the state to assess progress in strengthening families and protecting children. Our state cannot create effective policies and plans for the future unless we have a clear picture of where we stand today. The Factbook data can help us focus attention and action where we can have the most positive effect on the future for South Dakota's economy and families.

I encourage you to use the information in the Factbook as you make budget and program decisions concerning the well-being of children and families in this state. Our collective efforts hold promise for a bright future for all our children in South Dakota.

Sincerely,

A handwritten signature in black ink, appearing to read "Dennis Daugaard", written in a cursive style.

Dennis Daugaard

Welcome

South Dakota KIDS COUNT

Mission

South Dakota KIDS COUNT supports the decision-makers, advocates, and the public to act towards the best interest of all of South Dakota's children.

Vision

South Dakota KIDS COUNT project will be the primary source for program and policy decisions to ensure all children in South Dakota have the resources they need to be healthy, educated, and safe.

Values

- Quality, credible data are necessary to make responsible decisions about policy and resource allocation.
- All South Dakota children, regardless of race or ethnicity, deserve equal access to opportunity. Racial and ethnic outcome disparities are reduced or eliminated.
- The best outcomes for South Dakota's children are achieved when multiple organizations and groups work together as partners.

Some Cautions for Using the Data

Small numbers - Much of the data in the Factbook is calculated based on small numbers of events i.e., child death rate, infant mortality rate. As the population base becomes smaller, as it does in many South Dakota counties, the number or percent may vary considerably from year to year.

Understand the indicator - Rates are not reported for counties when the number of events are too small to be meaningful. Some indicators are reported in numbers, some as percents and some as rates (rate per 1,000, or rate per 100,000). Read the data sources and definitions found at the beginning of each section. How to Perform Data Calculations is found on page 10.

Time period - Data are based on different time intervals (e.g., state fiscal year, five-year averages). The reader is cautioned to check each indicator. Again, check definitions and data sources to determine the exact time period being reported.

Accessing KIDS COUNT Data

Each indicator section and county page can be accessed in portable document format (PDF) on the South Dakota KIDS COUNT website www.sdkidscount.org

The Kids Count Data Center provides easy access to state, county, and regional data for indicators in the SD KIDS COUNT Factbook and other indicators not published in the Factbook. The KIDS COUNT Data Center allows users to do more than just view the data. Users can also:

- Create a customized profile of data for a selected county or region
- Generate customized maps for presentations and publications that show how children are faring in a community;
- Embed automatically updated maps and graphs in other websites or blogs; and,
- View and share data quickly and easily with the enhanced mobile site for smart phones (mobile.kidscount.org).

Instructions on how to use the data center:

<http://www.usd.edu/business/south-dakota-kids-count/tool-box>

The infographic is titled "KIDS COUNT DATA CENTER" and features a URL at the top: <http://datacenter.kidscount.org/sd>. It is divided into three main sections: 1. SEARCH, 2. VISUALIZE, and 3. SHARE. Section 1, SEARCH, includes the instruction: "Enter any location, topic or keyword into the powerful search engine to find the statistics most relevant to your community." Section 2, VISUALIZE, includes the instruction: "Create custom profiles Create maps" and shows examples of a line graph and a bar chart. Section 3, SHARE, includes the instruction: "Post data visualizations on Facebook, add custom graphics to Tumblr and tweet about how the well-being of your state's children compares with the region and nation." The infographic also includes a quote: "Hundreds of child well-being indicators at your fingertips to encourage policies and support smart decisions for children and families."

South Dakota 2016 National Data Book Ranking

South Dakota was one of seven states to show a marked improvement in ranking in the annual KIDS COUNT® Data Book, which measures child well-being, moving from 18th to 14th place. The last time South Dakota ranked 14th in the nation was 2004. Some of the indicators contributing to the improved ranking were decreased rates of teen substance abuse, improved access to health insurance and a lower teen birth rate.

South Dakota ranked

- 6th in economic well-being (sixth last year),
- 26th in health (down from 20th last year),
- 31st in education, (up from 32nd last year), and
- 19th in family and community (up from 23rd last year).

This year's trend data is for 2008 through 2014. For the 16 indicators, South Dakota worsened on two indicators: the percent of eighth graders not proficient in math (from 61 percent to 66 percent); and the percent of children ages 3 and 4 not attending school (60 percent to 61 percent). Seven indicators showed improvement and seven showed no change. Although the percent of children in poverty showed no change, more than 37,000 children in South Dakota live in poverty, which is almost one in five.

South Dakota improved in three indicators in the Health Domain: children without health insurance, child and teen deaths, and teens who abuse alcohol or drugs. Even though the low birth weight babies indicator remained unchanged from 2008, there was an increase in the number and percent of babies born at a low birth weight during the past several years that may have contributed to the drop in the domain ranking from 20th last year to 26th. A lower number of teen births and fewer children living in single parent families boosted the Family and Community domain up four places in rank.

How to Perform Data Calculations

There are numerous computations in this report that involve rates, percentage, and percent change over time. Many of these calculations are similar. The one that is used depends on what one wants to say about the data. Basically, each of these calculations involves dividing one piece of data by another.

Percentage

A 'percentage' means one part in one hundred. Ten percent means 10 out of 100. To calculate a percent, divide the number in a subgroup (or smaller number) by the number in the total group and multiply by 100.

Example: Percent=(number in subgroup / number in whole group)
(number of births to single teens in South Dakota, 2015 [670]) / (number of all live births in South Dakota [12,323]) x 100.

$$670 / 12,323 = 0.0543 \times 100 = 5.43\%$$

Over 5% of live births in South Dakota, in 2015, were to single teens (single females under age 20).

Rate

A rate is simply the number of things per some other number, usually 100, 1,000 or other multiples of 10. A percentage is a rate - per 100. Depending on the size of the subgroup, a rate greater than 100 is often used. This is the case in health statistics such as infant mortality, child death, etc. To calculate a rate you need three pieces of information:

- (1) the total group number,
- (2) the number in the sub group and
- (3) the 'per' number—per 1,000, 10,000, or 100,000. The per number is your multiplier.

Example: Rate=(number in sub-group / number in whole group) x multiplier
(number of teen deaths in South Dakota, 2015 [40] / number of children ages 15-19 in South Dakota [56,581]) x multiplier.

$$40 / 56,581 = 0.0007069 \times 100,000 = 70.69 \text{ or rounded to } 70.7$$

The teen death rate for South Dakota in 2015 was 70.7 per 100,000 teens ages 15-19.

Rates can also be obtained per month or per day. For 2015 the figures for live births would show:

$$12,322 \text{ births} / 12 \text{ months} = 1,027 \text{ live births per month in South Dakota}$$

$$12,322 \text{ births} / 365 \text{ days} = 34 \text{ live births per day in South Dakota}$$

Percent Change

Change from one time period to the next can be calculated. This is called the 'percent change'. It is calculated in the following manner: (newer year number - older year number) / older year number x 100

Example:

2010 population under age 20 in South Dakota = 226,740 (newer number)

2000 population under age 20 in South Dakota = 234,385 (older number)

$$(226,740 - 234,385) = -7,645$$

$$-7,645 / 234,385 = -.00326 \times 100 = -3.26\% \text{ or rounded to } 3.3\%$$

This figure indicates that between 2000 and the 2010 the number of children under age 20 decreased by about 3%.

How to Interpret Health Data

Information and limitations of the health data:

Mortality and death rates are calculated by taking the number of deaths in any given category, dividing it by the total number of individuals in that category, and multiplying by 1,000 or 100,000 (whatever number is chosen).

$$\frac{\text{Total death}}{\text{Population Base}} \times 1,000$$

A percentage is calculated using the same formula only multiplied by 100.

As the population base becomes smaller, as it does in many counties in South Dakota, statistical variation becomes more prominent and more prone to anomalies. For example, let's say a county has 2 infants die out of 85 live births. If we divide 2 by 85 and multiply by 1,000 we get an infant mortality rate of 24 per 1,000. If the next year only 1 infant dies out of 85 live births, the infant mortality rate would be 12. This so-called large decrease is a result of statistical variation and the magnitude of the drop is exaggerated because of the use of a base of 1,000.

$$\frac{\text{Infant deaths}}{\text{Population Base}} \times 1,000 = \frac{2}{85} \times 1,000 = 0.0235 \times 1,000 = 24 \text{ per 1,000}$$

In an attempt to minimize chance variations five-year averages are used. Despite these precautions, in the most sparsely populated counties, using 5 year averages still will not reduce chance variation significantly for some of the indicators due to the small number of events. A rate or percent is not calculated for those counties where the event number is below 3.

The standard error (SE) of a rate is used in health statistics when studying or comparing rates. The SE defines a rate's variability and can be used to calculate a confidence interval (CI) to determine the actual variance of a rate 95% of the time. Rates for two different populations are considered significantly different when their confidence intervals do not overlap.

The Jackson County percent of births to single teens was 16% for 2011-15. The 95% confidence interval [CI] is 4.23%. This was based on 58 births to single teens out of 353 total live births in the county. Jackson County's percent of births to single teens is significantly different than the South Dakota rate. This is because the confidence intervals for Jackson County (12.2% to 20.7%) do not overlap the state's (6.1% to 6.5%). In other words, Jackson County's percent of births to single teens falls outside of the state's confidence interval and the percentages are higher than the state's making Jackson County's rate worse than the state's average.

The 95% confidence interval [CI] for Bennett County is 2.47%. The percent of low birthweight babies was 5.3%. The percent of low birthweight babies for Bennett County (based on 19 low birthweight babies for 2011-15 out of 356 total live births) is not significantly different from South Dakota because the percent of low birthweight babies for Bennett County (2.9% to 7.7%) overlap the state's (6.1% to 6.5%). In other words, Bennett County's percent of low birthweight babies falls within the state's confidence interval making Bennett County's rate the same as the state's average.

The 95% confidence interval [CI] for Hamlin County was 1.67%. The percent of low birthweight babies is 4.4%. The percent of low birthweight babies for Bennett County (based on 26 low birthweight babies during 2011-15 out of 597 total live births) is significantly different from South Dakota because the percent of low birthweight babies for Hamlin County (2.7% to 6.0%) do not overlap the state (6.1% to 6.5%). In other words, Hamlin County's percent of low birthweight babies does not fall within the state's confidence interval and the percentages are lower than the state's making Hamlin County's rate better than the state's average.

Demographic Indicators

Data Source: 2015 population estimates: Population Estimates for April 1, 2010 and July 1, 2015. Total and One-Dimensional Demographic Summaries (Hispanic, Race, Age, and Sex) by County. Missouri Census Data Center: <http://mcdc.missouri.edu>

Economic Indicators

TANF/SNAP/Medicaid

Internet sites: <http://dss.sd.gov/tanf>
<http://dss.sd.gov/snap/index.asp>
<http://dss.sd.gov/medicalservices>

Data Source: TANF/SNAP/Medicaid participation are from the South Dakota Department of Social Services. The years are for state fiscal years (July 1 - June 30). Data of 5 or fewer cases are not shown to avoid disclosure of information for particular individuals.

The Supplemental Nutrition Assistance Program (SNAP, formerly known as food stamps) benefits are provided to supplement the shopping recipient's food budget. The amount of benefits a household receives is based on its size, income and allowable expenses.

Child Care

Internet site: <http://dss.sd.gov/childcare>

Data Source: Child Care Services Assistance Program, Department of Social Services.

Types of Regulated Child Care:

Family Child Care Home - Registered: South Dakota law defines a Family Child Care Home as one in which care is given on a regular basis for any part of a 24 hour day to 12 or less children from more than one unrelated family. This includes any children under the age of six who are living in the home. Family child care is a service provided in the provider's home.

Family child care providers are registered rather than licensed. Registration is a voluntary process where the applicants declare their intent to provide family child

care and agree to comply with standards that have been established by the Department of Social Services. A registration certificate is in effect for two years. Registration is legally mandated when a provider receives compensation from public funds. Providers who are not receiving reimbursement from public funds and caring for 12 or fewer children are exempt from registration. A registered family child care provider must be at least 18 years old.

Group Family Child Care Home - Licensed: South Dakota law defines a Group Family Child Care Home as a facility providing child care for a part of a day as a supplement to regular parental care for 13 to 20 children from more than one family, including the provider's own children who are under the age of six years. A group family child care home may be located in the provider's own home or in a separate facility. Group family child care homes are mandated by law to be licensed regardless of funding source.

Child Care Center - Licensed: South Dakota law defines a Child Care Center as a facility which provides child care for part of a 24-hour period to 21 or more children from one or more unrelated families, including the provider's own children under the age of 6 years, regardless of the source of income. A child care center may be located in the provider's own home or in a separate facility. Child care centers are mandated by law to be licensed regardless of funding source. A child care center may be operated as a nonprofit organization or as an independent, proprietary facility.

Before & After School Care Center: Provides care and supervision before and after school hours for children who are five years of age or older and enrolled in school. Before & After School Care Center providers serve only school-age children and may be providing care for either part of a day or full-time during school breaks. These centers are required to become licensed regardless of the funding source or location of the program. Centers are inspected each year. The exemption to this requirement is if the after school program is providing educational or recreational activities

for children who come and go at their own discretion.

Funding Categories Available for Child Care Assistance:

TANF Child Care: Provides payment of child care expenses for TANF families in approved work activities, which includes community service. Families must be receiving cash TANF benefits. No co-payment is required.

Non-TANF Assistance: Available for low-income families who work or work and attend school. Families may earn up to 175% of the federal poverty level and still be eligible. Families must be working or in school a minimum of 80 hours per month or if attending a college, university or technical institute a minimum of 15 semester credit hours is required. No minimum hours are required for high school or GED students. Co-payment is based on family size and adjusted gross family income.

Transitional Child Care (TCC): Provides 12 months of child care payments for families whose TANF case closes because of income. May earn up to 175% of the federal poverty level and still be eligible. Co-payment is based on family size and adjusted gross household income.

The Division of Child Care (CCS) at the South Dakota Department of Social Services has a number of responsibilities that include funding, training and technical assistance for registered and licensed child care providers; child care facility development in response to local community needs. In addition, CCS provides direct child care assistance payments for qualifying families; a statewide training delivery system for child care providers; and the licensing and registration of child care programs as authorized by SDCL 26-6.

Licensing of Child Care Programs: Individuals or corporations who provide child care for more than 12 children are required by South Dakota law to be licensed. South Dakota Codified Law 26-6-9 requires licensure (regulation) of all child welfare agencies (including child care centers, group family child care homes and before-after-school programs) by the Department of Social Services.

South Dakota Codified Law 26-6-16 authorized the Department to develop standards of child care to be used for the regulation of these agencies. Child care licensing is a means of reducing the risk of harm to children in child care settings by establishing and enforcing regulations that require maintenance of minimum standards. Licensing is a form of consumer protection. Without licensing to achieve compliance with states regulations children would be at higher risk from fire, unsafe buildings and play equipment, injury, disease, and developmental impairment. In addition to prevention efforts, licensing workers also offer consultation to providers to help them increase quality of care beyond the minimum standards.

Direct Child Care Assistance:

South Dakota families with incomes below 175% of the Federal Poverty Level (FPL), families receiving TANF benefits and those transitioning off TANF may apply for financial assistance to help pay their child care costs. Eligibility for the program is based on household size and gross monthly income. A sliding fee scale is used to determine the amount of reimbursement and co-payments for each family. Families receiving child care assistance generally choose a provider who is licensed or registered (regulated) by the state. If a family chooses a provider who is unregulated by the state, certain criteria must be met, such as TB testing, screening for child abuse and neglect, and basic training. Unregulated providers can be a close relative, a family friend, or someone who provides care in the home of the family requesting assistance. Unregulated providers are limited in the number of children they may care for and the amount of reimbursement they can receive. All providers must be 18 years old.

Training and Education-Early Childhood Enrichment (ECE): This program was established in 1998, to meet the growing need for early childhood and out-of-school-time (OST) training and to assist CCS in efforts to recruit and retain quality child care providers across South Dakota. Five ECE sites are located throughout the state to offer a variety of accessible services that

support child care providers, teachers, parents and others involved in the care and education of children. ECE programs offer provide ongoing training, education, technical assistance and coaching opportunities to help licensed or registered child care providers meet mandated training requirements and to improve overall program quality. Registered family child care homes are required to obtain 6 hours of training each year; licensed group child care facilities are required to obtain 10 hours of training each year; licensed child care centers are required to obtain 20 hours of training each year. By offering this unique blend of direct services and expertise, the ECE system helps to ensure children receive quality care in an enriched learning environment.

Safety Indicators

Juvenile Offense Referrals

Internet site: <http://uj.s.sd.gov>

Data Source: Court Services Department of the South Dakota Unified Judicial System.

Definitions: The figures represent the number of youth under 18 years of age who are referred to the Unified Judicial System (UJS) by the states attorneys. Numbers are for the county in which apprehension took place and represent the number of cases rather than individuals. In other words, if a child was referred to UJS for several different offenses, he or she would be counted several different times. Juvenile informational complaints may be filed with the states attorney by law enforcement officials, parents, court services officers (alleged probation violations), and others. The states attorney may decide to file a formal petition, refer the case to a court services department for a 90-day informal adjustment, refer the case to a private agency approved by the court, or take no action.

Commitments to Department of Corrections

Internet site: <http://uj.s.sd.gov>

Data Source: Court Services Department of the South Dakota Unified Judicial System.

Definition: The total number of juveniles committed

to the Department of Corrections during the reporting period. The figure includes youth who have had multiple petitions committing them to the Department of Corrections with separate dispositional dates during the reporting period. Figures are by county, which means the county of record in which the judge conducted the adjudication and dispositional proceedings. It can be county of residence or the county where the offense occurred.

Youth Related Traffic Crashes

Internet site:

http://dps.sd.gov/enforcement/accident_records/Annual_Crash_Reports.aspx

Data Source: 2015 South Dakota Motor Vehicle Traffic Crash Summary. Department of Public Safety, Accident Records Office.

Child Abuse & Neglect

Internet site: <http://dss.sd.gov/cps>

Data Source: Department of Social Services, Child Protection Services.

Child Protection Services is a division of the South Dakota Department of Social Services which:

- 1) Completes safety assessments of children who are reported as abused and neglected;
- 2) Assures provision of services to the children and families when safety of the children is a concern;
- 3) Provides reunification services to children and families when out-of-home placements of the children are necessary; and
- 4) Provides services to develop permanent placements for children in out-of-home placement when efforts to return the children to their family are not successful.

Child Protection Services responds to reports of suspected child abuse or neglect involving a parent, guardian or custodian through a process referred to as an Initial Family Assessment. An Initial Family Assessment is a neutral approach to gathering information and a thorough family centered evaluation of child maltreatment and family functioning. Upon the completion of the Initial Family Assessment, Child

neglect has occurred and whether the child is safe or unsafe in the home due to the existence of threats to child safety. Threats to child safety may exist in a family situation even if abuse and neglect has not yet occurred.

When threats to child safety require court ordered out-of-home placement, the first goal considered is reunification of the child with the parents. Child Protection Services provides services to improve the ability of the parent to safely care for their child. Child Protection Services has responsibility for developing a permanent placement if the court determines the parents are not able to make the changes necessary to safely provide for their child making reunification with the parents no longer an option,. Those permanent placement options are adoption, guardianship with a relative or non-relative family or other permanent living arrangement.

Admission to Drug or Alcohol Treatment Programs

Internet site:

<http://dss.sd.gov/behavioralhealth>

Data Source: The South Dakota Department of Social Services, Behavioral Health Services.

Definition: Admissions include youth under 18 years of age who received state accredited alcohol and drug services ranging from crisis intervention to structured treatment programs. The person is counted once for every program in which the client participated. However, if a person was admitted to the same program more than once, he or she is only counted once. Admissions include both residential and outpatient treatment programs. Admission totals may include juveniles who are counted more than once if they received services at different programs. The reason for this is because the system does not track clients by a common identifier but by facility. Although the possibility of a client being counted more than once exists, it is probably uncommon.

Health Indicators

Internet site: <http://doh.sd.gov>

Data Source: South Dakota Department of Health.

Data Indicators & Definitions:

A dash [-] indicates there were no events. An asterisk [] indicates there were less than three events and no rate/percent was calculated.*

Infant mortality (rate): The number of deaths of infants under one year of age per 1,000 live births.

Low birth weight babies (percent): Low birth weight babies are those born weighing less than 2,500 grams (about 5 and one half pounds).

Child death (rate): The number of deaths for children ages 1-14 per 100,000, from all causes.

Teen violent death (rate): The number of deaths from homicides, suicides, and accidents to teens ages 15-19 years per 100,000 teens.

Births to single teens (percent): The percent of all live births to single females under the age of 20.

Women receiving prenatal care (percent): The number of live single births to women receiving prenatal care during the first trimester (first three months) of pregnancy, by county of residence.

Education Indicators

Internet site:

<http://www.doe.sd.gov/ofm/statdigest.aspx>

Enrollments and dropouts

Data Source: South Dakota Department of Education. Statistics for dropout rates are for grades 7 through 12 and enrollment are for pre-kindergarten through grade 12.

Definitions: *Dropout rate:* The rate is calculated by dividing the number of dropouts grades 7-12 divided by the grade 7-12 enrollment, based on fall enrollment census count. The SD-DOE calculates the dropout rate in this manner to conform with Federal guidelines. A "NA" indicates "not applicable".

Enrollment: Total number of students enrolled in school on the last Friday of school in September.

Child Count

Definition: Child Count data on disabilities are for individuals age three through twenty-one. This information is obtained from the Special Education Child Count done every December to determine age, placement alternatives, and disabling conditions for children with special needs. The number presented represents the number of children with disabling conditions in the designated school district. These conditions include: deaf, blind, seriously emotionally disturbed, mental retardation, hearing and visual impairments, specific learning disabilities, multiple disabilities, orthopedic impairments, speech/language impairments, other health impairments, autism, and traumatic brain injury. Child Count data does not include data from private or BIA schools but does include Chapter I state operated/state supported programs.

Free and Reduced Price School Lunches

Internet site <http://www.doe.sd.gov/cans/nslp.aspx>

Data Source: Child and Adult Nutrition Services, Department of Education. Data for the SD Department of Human Services and SD Department of Corrections are included as inmates and clients who are under age 21 can participate in the program.

Definitions: "DNP" = Did Not Participate in the School Lunch Program. A double asterisk (**) means the agency has 90% or more of the children eligible for free or reduced price meals or have 10 or fewer children enrolled. In accordance with 7CFR 245 6(f), the percentages are not listed because to do so would overtly identify the children directly or by deduction. Contact Child and Adult Nutrition Services at 605-773-3413 if there are any questions.

Annie E. Casey Foundation
www.aecf.org

The Annie E. Casey Foundation is a private charitable organization, dedicated to helping build better futures for disadvantaged children in the United States. It was established in 1948 by Jim Casey, one of the founders of UPS, and his siblings, who named the Foundation in honor of their mother.

The primary mission of the Foundation is to foster public policies, human-service reforms, and community supports that more effectively meet the needs of today's vulnerable children and families. In pursuit of this goal, the Foundation makes grants that help states, cities and neighborhoods fashion more innovative, cost-effective responses to these needs.

**UNIVERSITY OF
SOUTH DAKOTA**
BEACOM SCHOOL OF BUSINESS

University of South Dakota
www.usd.edu

Located in Vermillion, SD, USD was founded in 1862 by the Dakota Territorial Legislature, and is the state's oldest university. The University was accredited by the North Central Association of College and Schools in 1913.

The University offers more than 100 academic programs in its eight schools and colleges.

It is also home to the state's only Law and Medical schools, and College of Fine Arts. The University also has a professionally accredited School of Business and the College of Arts and Sciences is a core for a liberal arts education.

Beacom School of Business
www.usd.edu/business

The Beacom School of Business is the region's leader in business education offering a quality program that is fully accredited by AACSB International. Pursue a Bachelor of Business Administration (BBA) degree in accounting, business administration, economics, finance, health services administration, human resource management, management, or marketing.

Faculty challenge students to develop excellent critical thinking skills in the classroom and then apply those skills to real-world experiences. Through involvement in the many professional organizations or participation in quality internships, business knowledge will be put into action.

The Beacom School of Business is committed to USD's Inclusive Excellence initiatives and committed to cultivating an environment of Inclusive Excellence at all levels of the school. The Beacom School of Business is committed to graduating globally and culturally aware business students who are equipped with the tools to embrace and practice inclusiveness.

Your future success is our business. Become More!
